

E2E Service System - Workflows

1. 90-Day Pilot Workflow

Day 0-7: Tenant Onboarding

Super Admin Actions:

1. Create tenant sub-account
2. Set subdomain (e.g., [acme.e2e.com](#))
3. Assign billing plan (Starter/Growth/Enterprise)
4. Select "90-Day Pilot" template
5. Send welcome email to Client Admin

Client Admin Actions:

1. Receive welcome email, set password
2. Log in to tenant dashboard
3. Set pilot targets (e.g., -20% complaints, +2 CSAT)
4. Import branches (CSV or manual)
5. Import users (CSV or manual)
6. Assign roles (Manager, Coach, Staff, Executive Viewer)
7. Schedule kickoff meeting with leadership

Day 8-14: Leadership Kickoff

Client Admin Actions:

1. Run kickoff meeting (use template agenda)
2. Log leadership commitments (timestamped)
3. Set accountability calendar (weekly check-ins)
4. Assign managers to branches

Manager Actions:

1. Receive welcome email
2. Log in, view branch dashboard

3. Review team roster
4. Download manager toolkit

Day 15-30: Launch Adoption

Manager Actions:

1. Run first 15-minute huddle
 - Review yesterday's hits/misses
 - Assign one roleplay
 - Log coaching
 - Mark blockers
2. Repeat daily huddles
3. Assign micro-habits to team

Coach Actions:

1. Schedule first roleplay session
2. Upload materials (scenarios, rubrics)
3. Run session, score roleplays
4. Provide feedback

Staff Actions:

1. Complete daily micro-habit
2. Participate in roleplay
3. Attend huddles

Day 31-60: Scale & Monitor

Client Admin Actions:

1. View org-wide dashboard (weekly)
2. Check branch variance
3. Review alerts (missed huddles, CSAT drops)
4. Export weekly reports

Manager Actions:

1. Continue daily huddles
2. Approve coaching logs

3. Monitor team adherence
4. Adjust coaching focus based on data

Day 61-90: Measure ROI

Client Admin Actions:

1. Compare baseline vs current metrics
2. Export executive scorecard (PDF)
3. Review with leadership
4. Decide: scale to more branches or adjust

Executive Viewer Actions:

1. View executive scorecard
2. Review 3 wins, 3 risks, next 2 actions
3. Share with board/investors

2. Daily Manager Huddle (15 Minutes)

Step 1: Review Yesterday (5 min)

- What went well? (hits)
- What didn't? (misses)
- Any customer complaints?

Step 2: Assign Roleplay (3 min)

- Pick one scenario from library
- Assign to 2-3 staff
- Set deadline (today or tomorrow)

Step 3: Log Coaching (5 min)

- Quick 1-tap form
- Staff name, topic, notes
- Optional: attach photo/video

Step 4: Mark Blockers (2 min)

- Any issues preventing progress?
- Escalate to Client Admin if needed

3. Roleplay/Simulation Workflow

Before Session

1. Coach schedules session
2. Selects scenario from library
3. Uploads materials (rubric, demo video)
4. Sends reminders to attendees (email/SMS)

During Session

1. Staff perform roleplay (in pairs or with coach)
2. Coach scores using rubric (1-5 scale)
3. Coach provides instant feedback
4. Improvement tips logged

After Session

1. Scores saved to database
2. Staff view scores and feedback
3. Manager reviews session report
4. Identify staff who need follow-up

4. Micro-Habit Completion Workflow

Morning (8am)

1. Staff receives push notification
2. "Today's Habit: Greet 3 customers with a smile"

During Shift

1. Staff completes habit
2. Optional: upload photo/video proof
3. Mark complete in app

Evening

1. System calculates streak
2. Award badge if milestone (7, 14, 30 days)
3. Send congratulations notification

5. Coaching Log Workflow

Manager Creates Log

1. Observe staff behavior during shift
2. Open app, tap "Log Coaching"
3. Fill form:
 - Staff name (dropdown)
 - Topic (e.g., "Tone of voice")
 - Notes (quick text)
 - Evidence (photo/video, optional)
4. Submit log

Approval Flow

1. Log goes to Manager for approval
2. Manager reviews and approves/rejects
3. If approved, log is immutable
4. If rejected, coach can edit and resubmit

Export for Audit

1. Client Admin or Manager exports logs (CSV)
2. All fields included (date, coach, staff, topic, notes, evidence)
3. Use for compliance audits

6. ROI Reporting Workflow

Weekly

1. System calculates metrics:
 - CSAT average (last 7 days)
 - Complaints count (last 7 days)
 - Adoption % (habits completed, huddles run)
2. Compare to baseline
3. Update dashboards

Monthly

1. System generates executive scorecard (PDF)
2. Includes:
 - KPI deltas (complaints %, CSAT points)
 - 3 wins (top-performing branches)
 - 3 risks (lagging branches, missed huddles)
 - Next 2 actions (recommendations)
3. Email to Client Admin and Executive Viewers

End of Pilot (Day 90)

1. Final comparison: baseline vs current
2. Calculate ROI:
 - Complaints reduction %
 - CSAT improvement (points)
 - Repeat customer ratio change
3. Export final report (PDF)
4. Client Admin reviews with leadership
5. Decision: scale or adjust

7. Alert & Notification Workflow

Trigger Conditions

- Habit completion < 70% for 7 days
- CSAT drops ≥ 2 points
- Manager misses 2+ huddles
- Branch variance in bottom 3

Alert Flow

1. System detects condition
2. Creates alert record in database
3. Sends notification:
 - Email to Client Admin and Manager
 - SMS (if enabled)
 - In-app notification
4. Alert status: Active
5. When resolved, status: Resolved

Smart Nudges

- "Missed 2 huddles this week. Run one today?"
- "Branch CSAT down 2 pts. Review coaching logs."
- "3 staff haven't completed habits in 5 days. Follow up?"

8. Branch Variance Analysis Workflow

Daily Calculation

1. System aggregates metrics by branch:
 - CSAT average
 - Complaints count
 - Adoption % (habits, huddles, roleplays)
2. Calculate composite score (0-100)
3. Rank branches (1st, 2nd, 3rd, etc.)

Color Coding

- Green: Top 3 branches (score ≥ 80)
- Yellow: Middle branches (score 60-79)
- Red: Bottom 3 branches (score < 60)

Dashboard Display

1. Heatmap view (all branches)
2. Click branch to see details
3. Export to CSV

Action Items

1. Client Admin reviews variance weekly
2. Identifies lagging branches
3. Assigns additional coaching or resources
4. Monitors improvement

9. Integration Workflows (Phase 2/3)

CSAT Sync (Zendesk/Freshdesk)

1. Client Admin connects integration
2. Provides API key
3. System syncs CSAT surveys (daily)
4. Auto-imports to metrics table
5. Updates dashboards

HRIS Sync (Azure AD/Google)

1. Client Admin enables SSO
2. System syncs users (daily)
3. Auto-creates/updates user accounts
4. Assigns roles based on directory groups

Calendar Sync (Google/Microsoft)

1. Coach schedules session in E2E
2. System creates calendar event
3. Sends invites to attendees
4. Syncs updates (reschedule, cancel)

10. Billing Workflow (Phase 2)

Subscription Creation

1. Super Admin assigns plan to tenant
2. System creates Stripe subscription
3. Sends invoice to Client Admin
4. Payment processed automatically

Usage Tracking

1. System tracks usage daily:
 - Active users
 - SMS credits used
 - Storage used (GB)
2. If usage exceeds plan limits:
 - Send warning notification
 - Offer upgrade to higher plan

Payment Failed

1. Stripe webhook notifies system
2. System updates tenant status: Suspended
3. Send email to Client Admin
4. Tenant has read-only access
5. After 7 days, tenant status: Cancelled

11. Data Export Workflow

CSV Export

1. User clicks "Export" button
2. System queries database (filtered by tenant_id)
3. Generates CSV file
4. Downloads to user's device

PDF Export (Executive Scorecard)

1. System queries metrics (last 30 days)
2. Renders PDF template (Puppeteer or PDFKit)
3. Includes:
 - KPI deltas
 - Branch variance chart
 - 3 wins, 3 risks, next 2 actions
4. Uploads to S3
5. Sends email with PDF link

Scheduled Reports

1. Client Admin schedules monthly report
2. System runs cron job (1st of month)
3. Generates report (PDF)
4. Emails to Client Admin and Executive Viewers

12. Tenant Lifecycle Workflow

Active

- Full access to platform
- Billing active
- All features enabled

Suspended (Payment Overdue)

- Read-only access
- Cannot create new sessions/habits
- Cannot log coaching
- Billing reminder sent daily

Cancelled (After 7 Days Suspended)

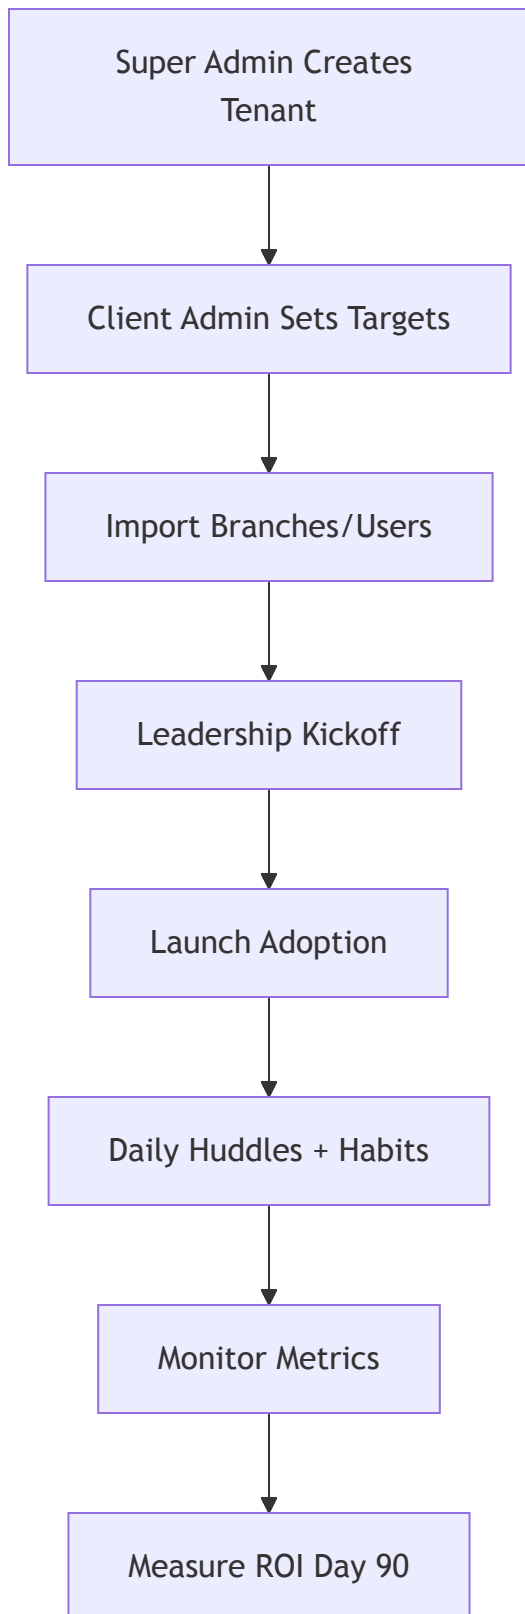

- No access to platform
- Data retained for 30 days
- Final invoice sent

Deleted (After 30 Days Cancelled)

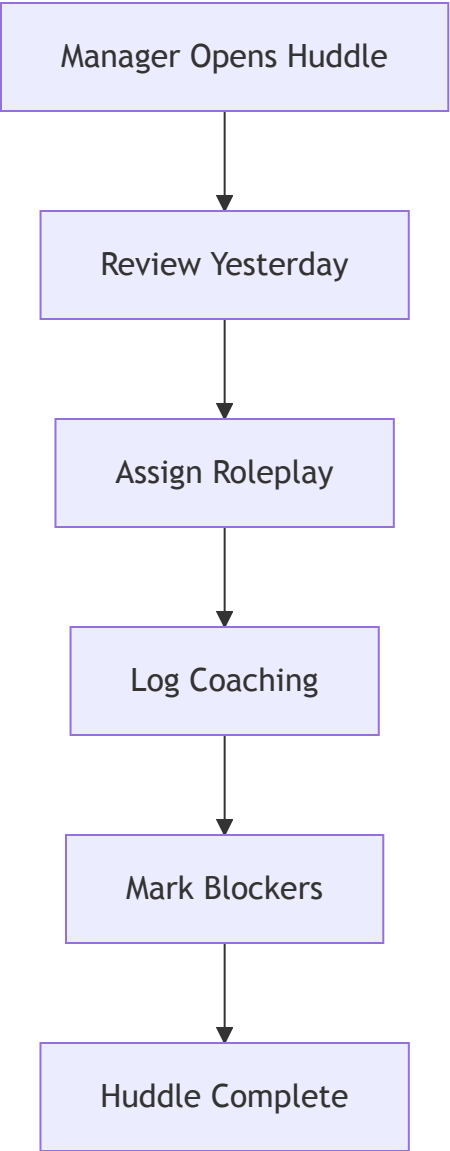

- All data permanently deleted
- Cannot be recovered
- Tenant record archived
