3. Access Level Definitions

Full

- Complete CRUD access
- No restrictions
- Can access all tenants/organizations

Own Org

- Access to own organization only
- Full CRUD within organization
- Cannot access other organizations

Own Branch

- Access to own branch only
- Full CRUD within branch
- Cannot access other branches

Assigned

- Access to assigned resources only
- Limited to specific sessions/branches
- Cannot access unassigned resources

Own

- Access to own data only
- Can view and edit personal information
- Cannot access other users' data

(RO) Read-Only

- View access only
- Cannot create, edit, or delete
- Can export reports

✖ None

- No access
- API returns 403 Forbidden

4. Data Scope by Role

Super Admin

Scope: ALL TENANTS

```
|— Tenant 1
|   |— Organization 1
|   |   |— Branch 1, 2, 3, ...
|   |   |— Users (all roles)
|— Tenant 2
|   |— ...
|— Tenant N
|   |— ...
```

Client Admin

Scope: OWN TENANT ONLY

```
|— Tenant 1 (Own)
|   |— Organization 1
|       |— Branch 1, 2, 3, ... (All)
|       |— Users (All roles)
```

Manager

Scope: OWN BRANCH ONLY

```
|— Tenant 1
|   |— Organization 1
|       |— Branch 1 (Own)
|           |— Users (Own team only)
```

Coach

Scope: ASSIGNED BRANCHES

- └ Tenant 1
 - └ Organization 1
 - └ Branch 1 (Assigned)
 - └ Branch 2 (Assigned)
 - └ Users (Session attendees only)

Staff

Scope: OWN DATA ONLY

- └ Tenant 1
 - └ Organization 1
 - └ Branch 1
 - └ User (Self)
 - └ Own habits
 - └ Own roleplays
 - └ Own recognition

Executive Viewer

Scope: OWN TENANT (READ-ONLY)

- └ Tenant 1 (Own)
 - └ Organization 1
 - └ Branch 1, 2, 3, ... (All - View Only)
 - └ Users (View Only)

5. API Authorization Examples

Middleware Check

```
// Check if user can access resource
async canAccess(user: User, resource: string, action: string): Promise<boolean> {
  // Super Admin: Full access
  if (user.role === 'SuperAdmin') return true;

  // Client Admin: Own org only
  if (user.role === 'ClientAdmin') {
    return resource.tenantId === user.tenantId;
  }

  // Manager: Own branch only
  if (user.role === 'Manager') {
    return resource.branchId === user.branchId;
  }

  // Coach: Assigned branches only
  if (user.role === 'Coach') {
    return await this.isAssignedToBranch(user.id, resource.branchId);
  }

  // Staff: Own data only
  if (user.role === 'Staff') {
    return resource.userId === user.id;
  }

  // Executive: Read-only, own org
  if (user.role === 'ExecutiveViewer') {
    return action === 'read' && resource.tenantId === user.tenantId;
  }

  return false;
}
```

Route Guards

```
// Super Admin only
@Roles('SuperAdmin')
@Post('admin/tenants')
async createTenant() { ... }

// Client Admin or Super Admin
@Roles('SuperAdmin', 'ClientAdmin')
@Post('branches')
async createBranch() { ... }

// Manager or Coach
@Roles('Manager', 'Coach')
@Post('sessions')
async createSession() { ... }

// Staff only
@Roles('Staff')
@Post('habits/:id/complete')
async completeHabit() { ... }

// All except Staff
@Roles('SuperAdmin', 'ClientAdmin', 'Manager', 'Coach', 'ExecutiveViewer')
@Get('reports/branch-performance')
async getBranchReport() { ... }
```

6. Permission Inheritance

Super Admin

↓ (inherits all permissions)

Client Admin

↓ (inherits branch/user management)

Manager

↓ (inherits team management)

Coach

↓ (inherits session management)

Staff

↓ (basic user permissions)

Note: Executive Viewer does NOT inherit permissions. It's a separate read-only role.

7. Special Cases

Multi-Branch Manager

- Manager assigned to multiple branches
- Can access all assigned branches
- Permissions apply to each branch independently

Multi-Branch Coach

- Coach can work across multiple branches
- Access limited to assigned sessions
- Cannot view branch-level data

Impersonation (Super Admin)

- Super Admin can impersonate any user
- Used for support and troubleshooting
- All actions logged in audit trail

Delegation (Client Admin)

- Can delegate specific permissions to Manager
- Temporary access grants
- Expires after set period
